@TheTestDoctor

*The oldest and strongest  
motion of mankind is fear,  
and the oldest and strongest  
kind of fear is fear of the  
unknown”*

**H.P Lovecraft: Supernatural  
horror in Literature**

# **What are you afraid of?**

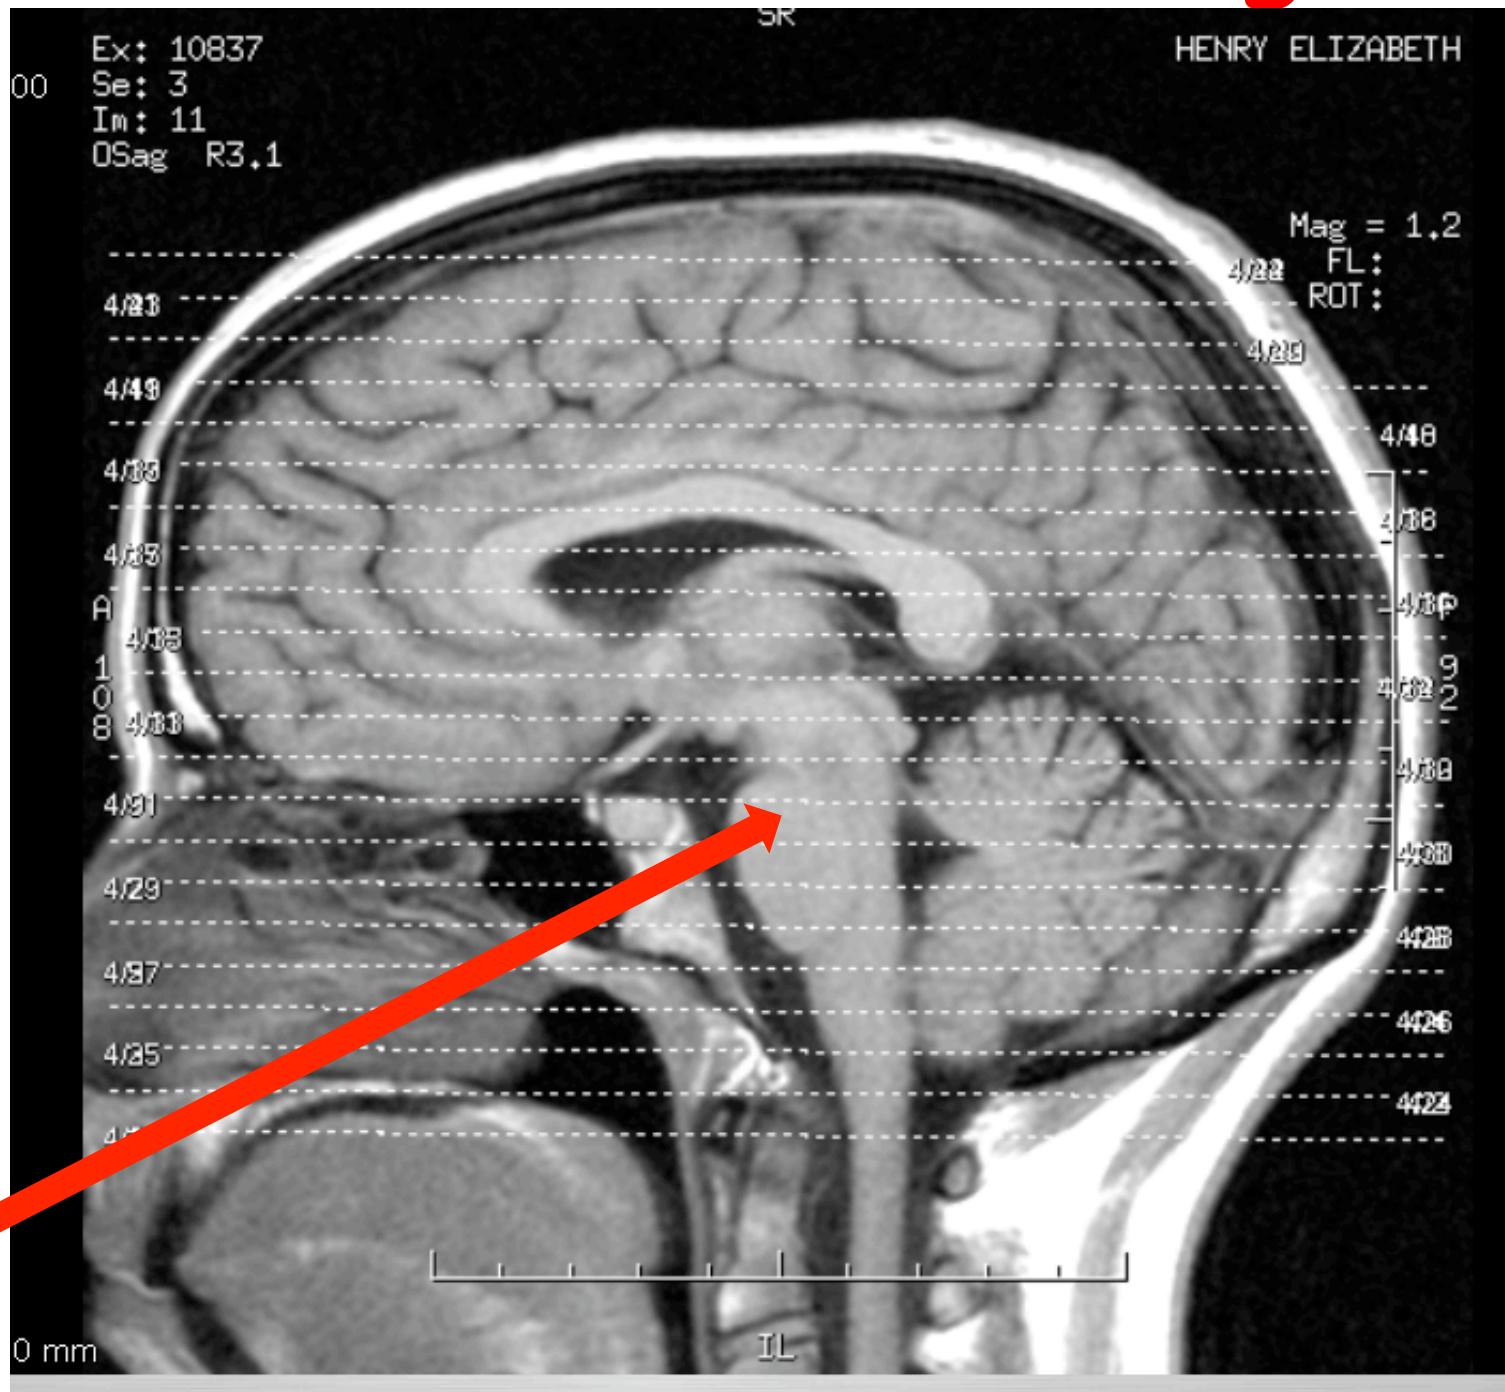

- 1. Think about your greatest fear**
- 2. Write or draw something that represents that fear**
- 3. Hold it up and SHARE!**

# Fear and the body

# **Fight or flight?**

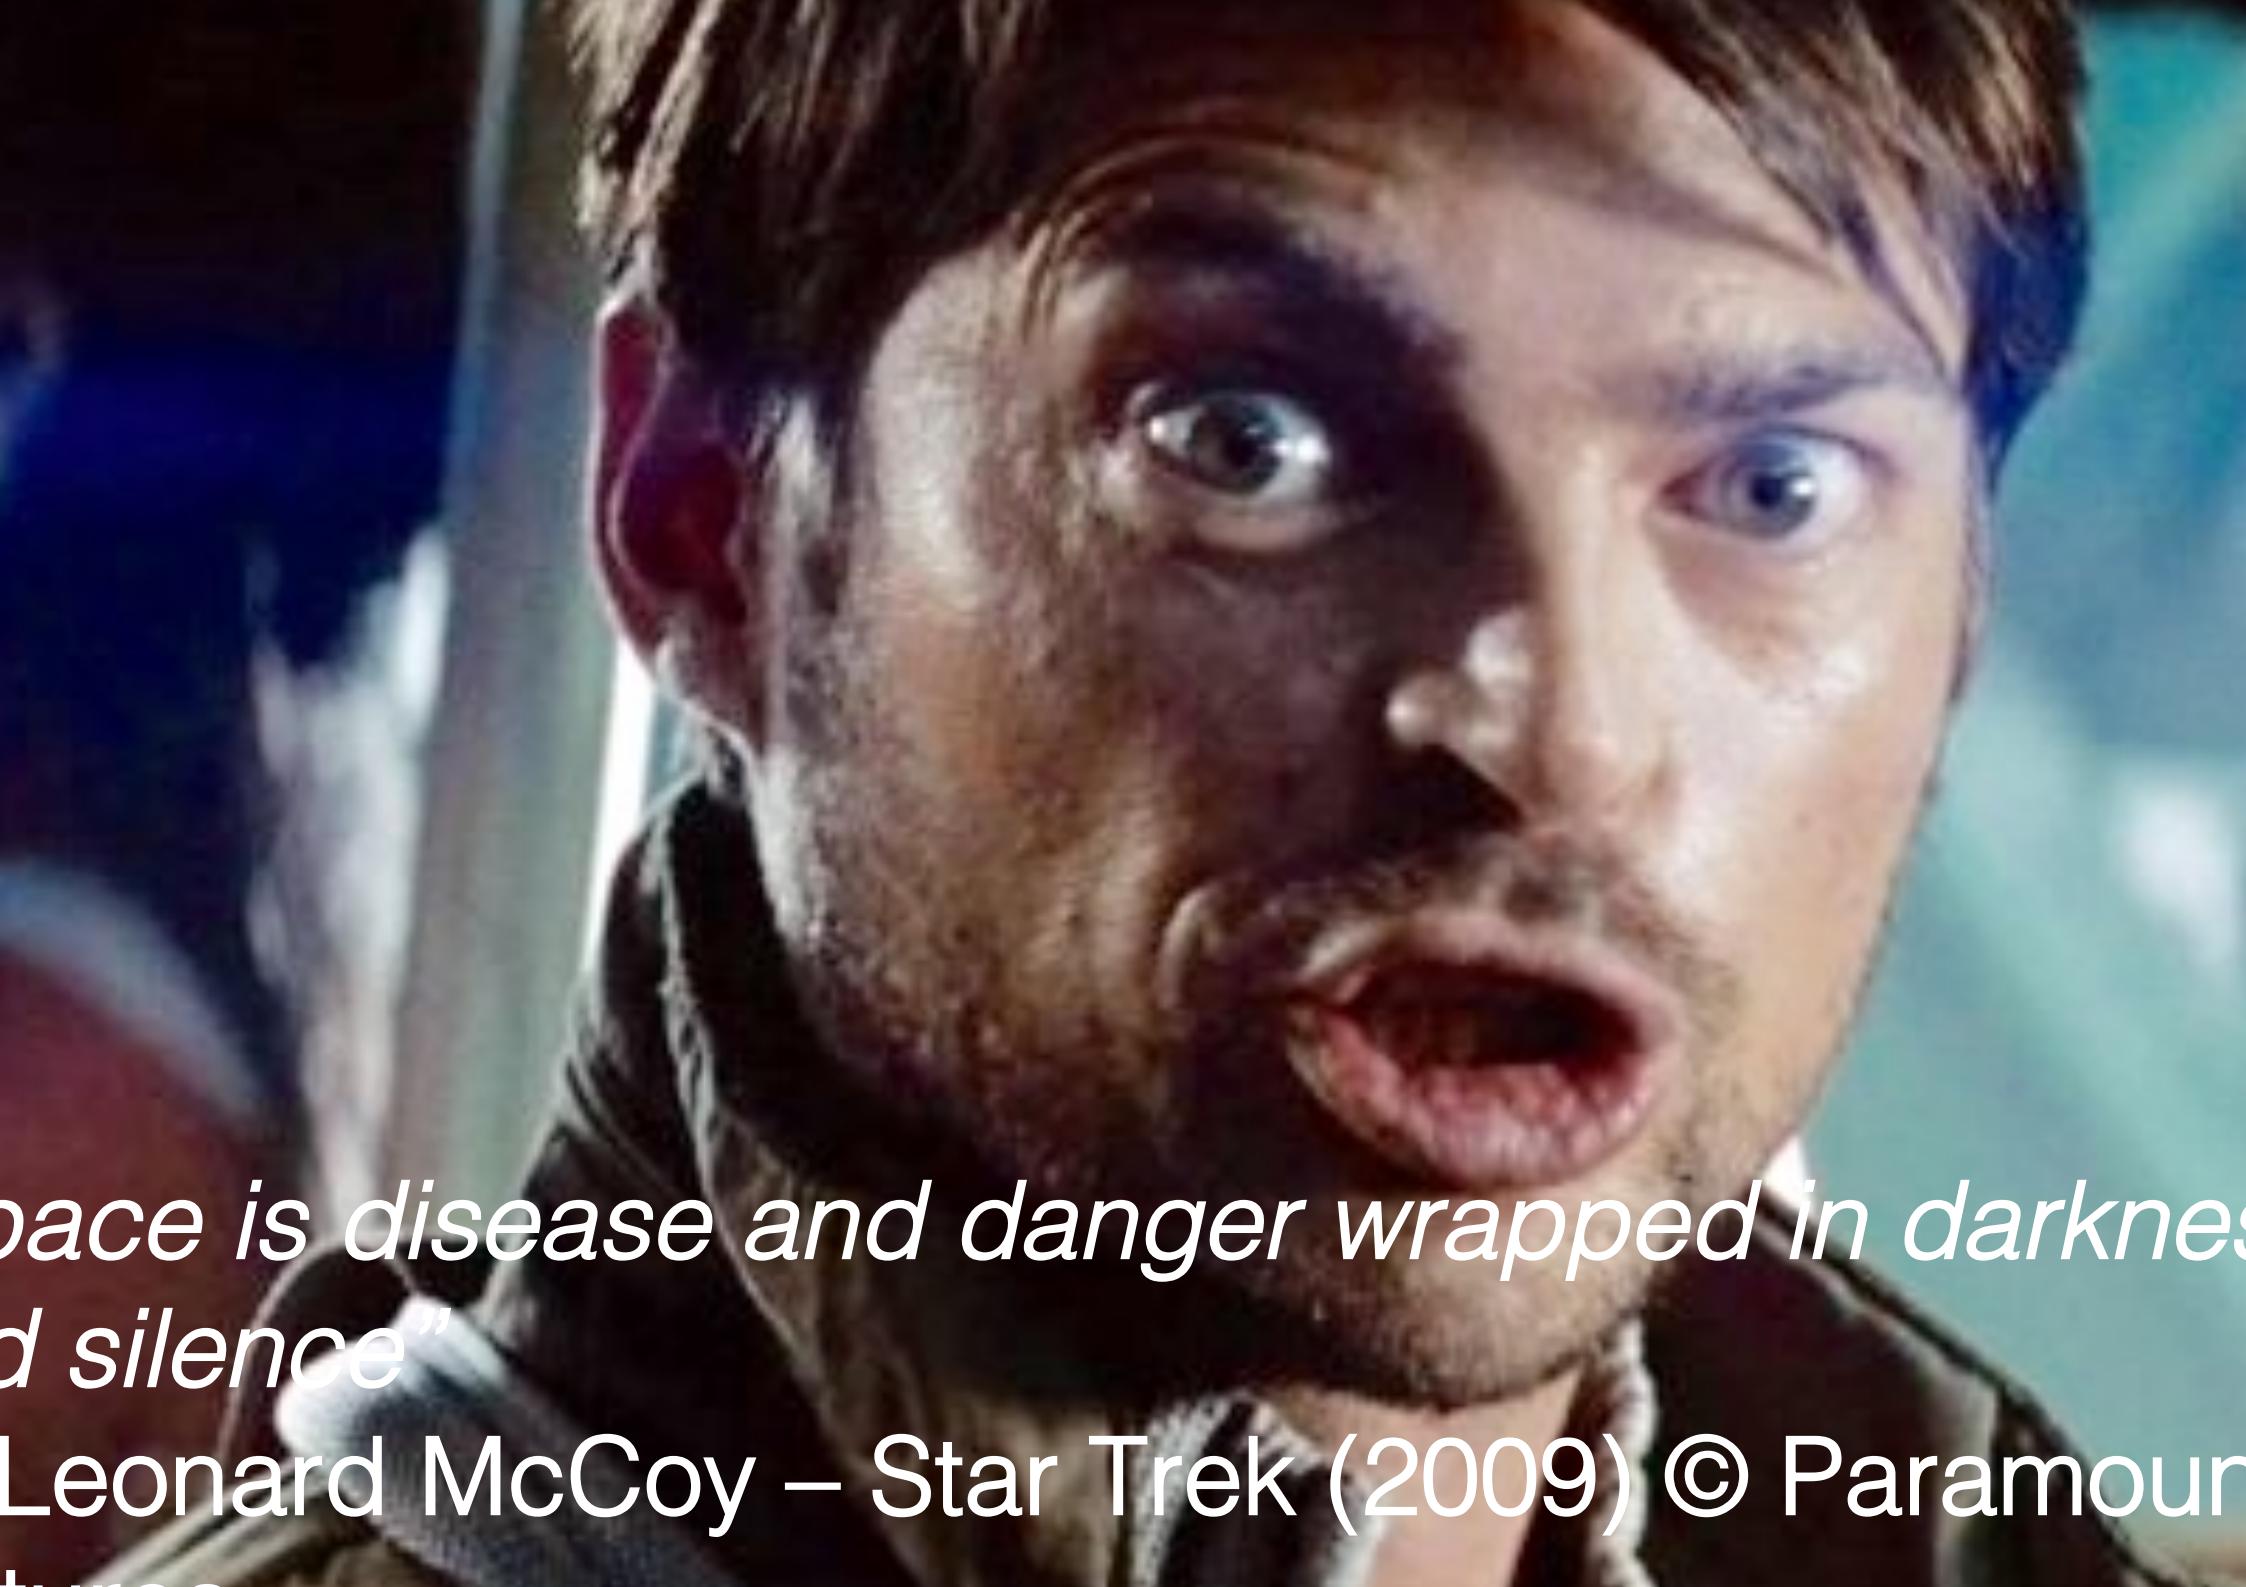

**Do we run away from our  
fears?**

**Do we fight them?**

**...or do we learn from  
them?**

# Fear as a tool

- Honing instincts
- Managing threats
- Acquiring skills
- Identifying goals
- Achieving targets

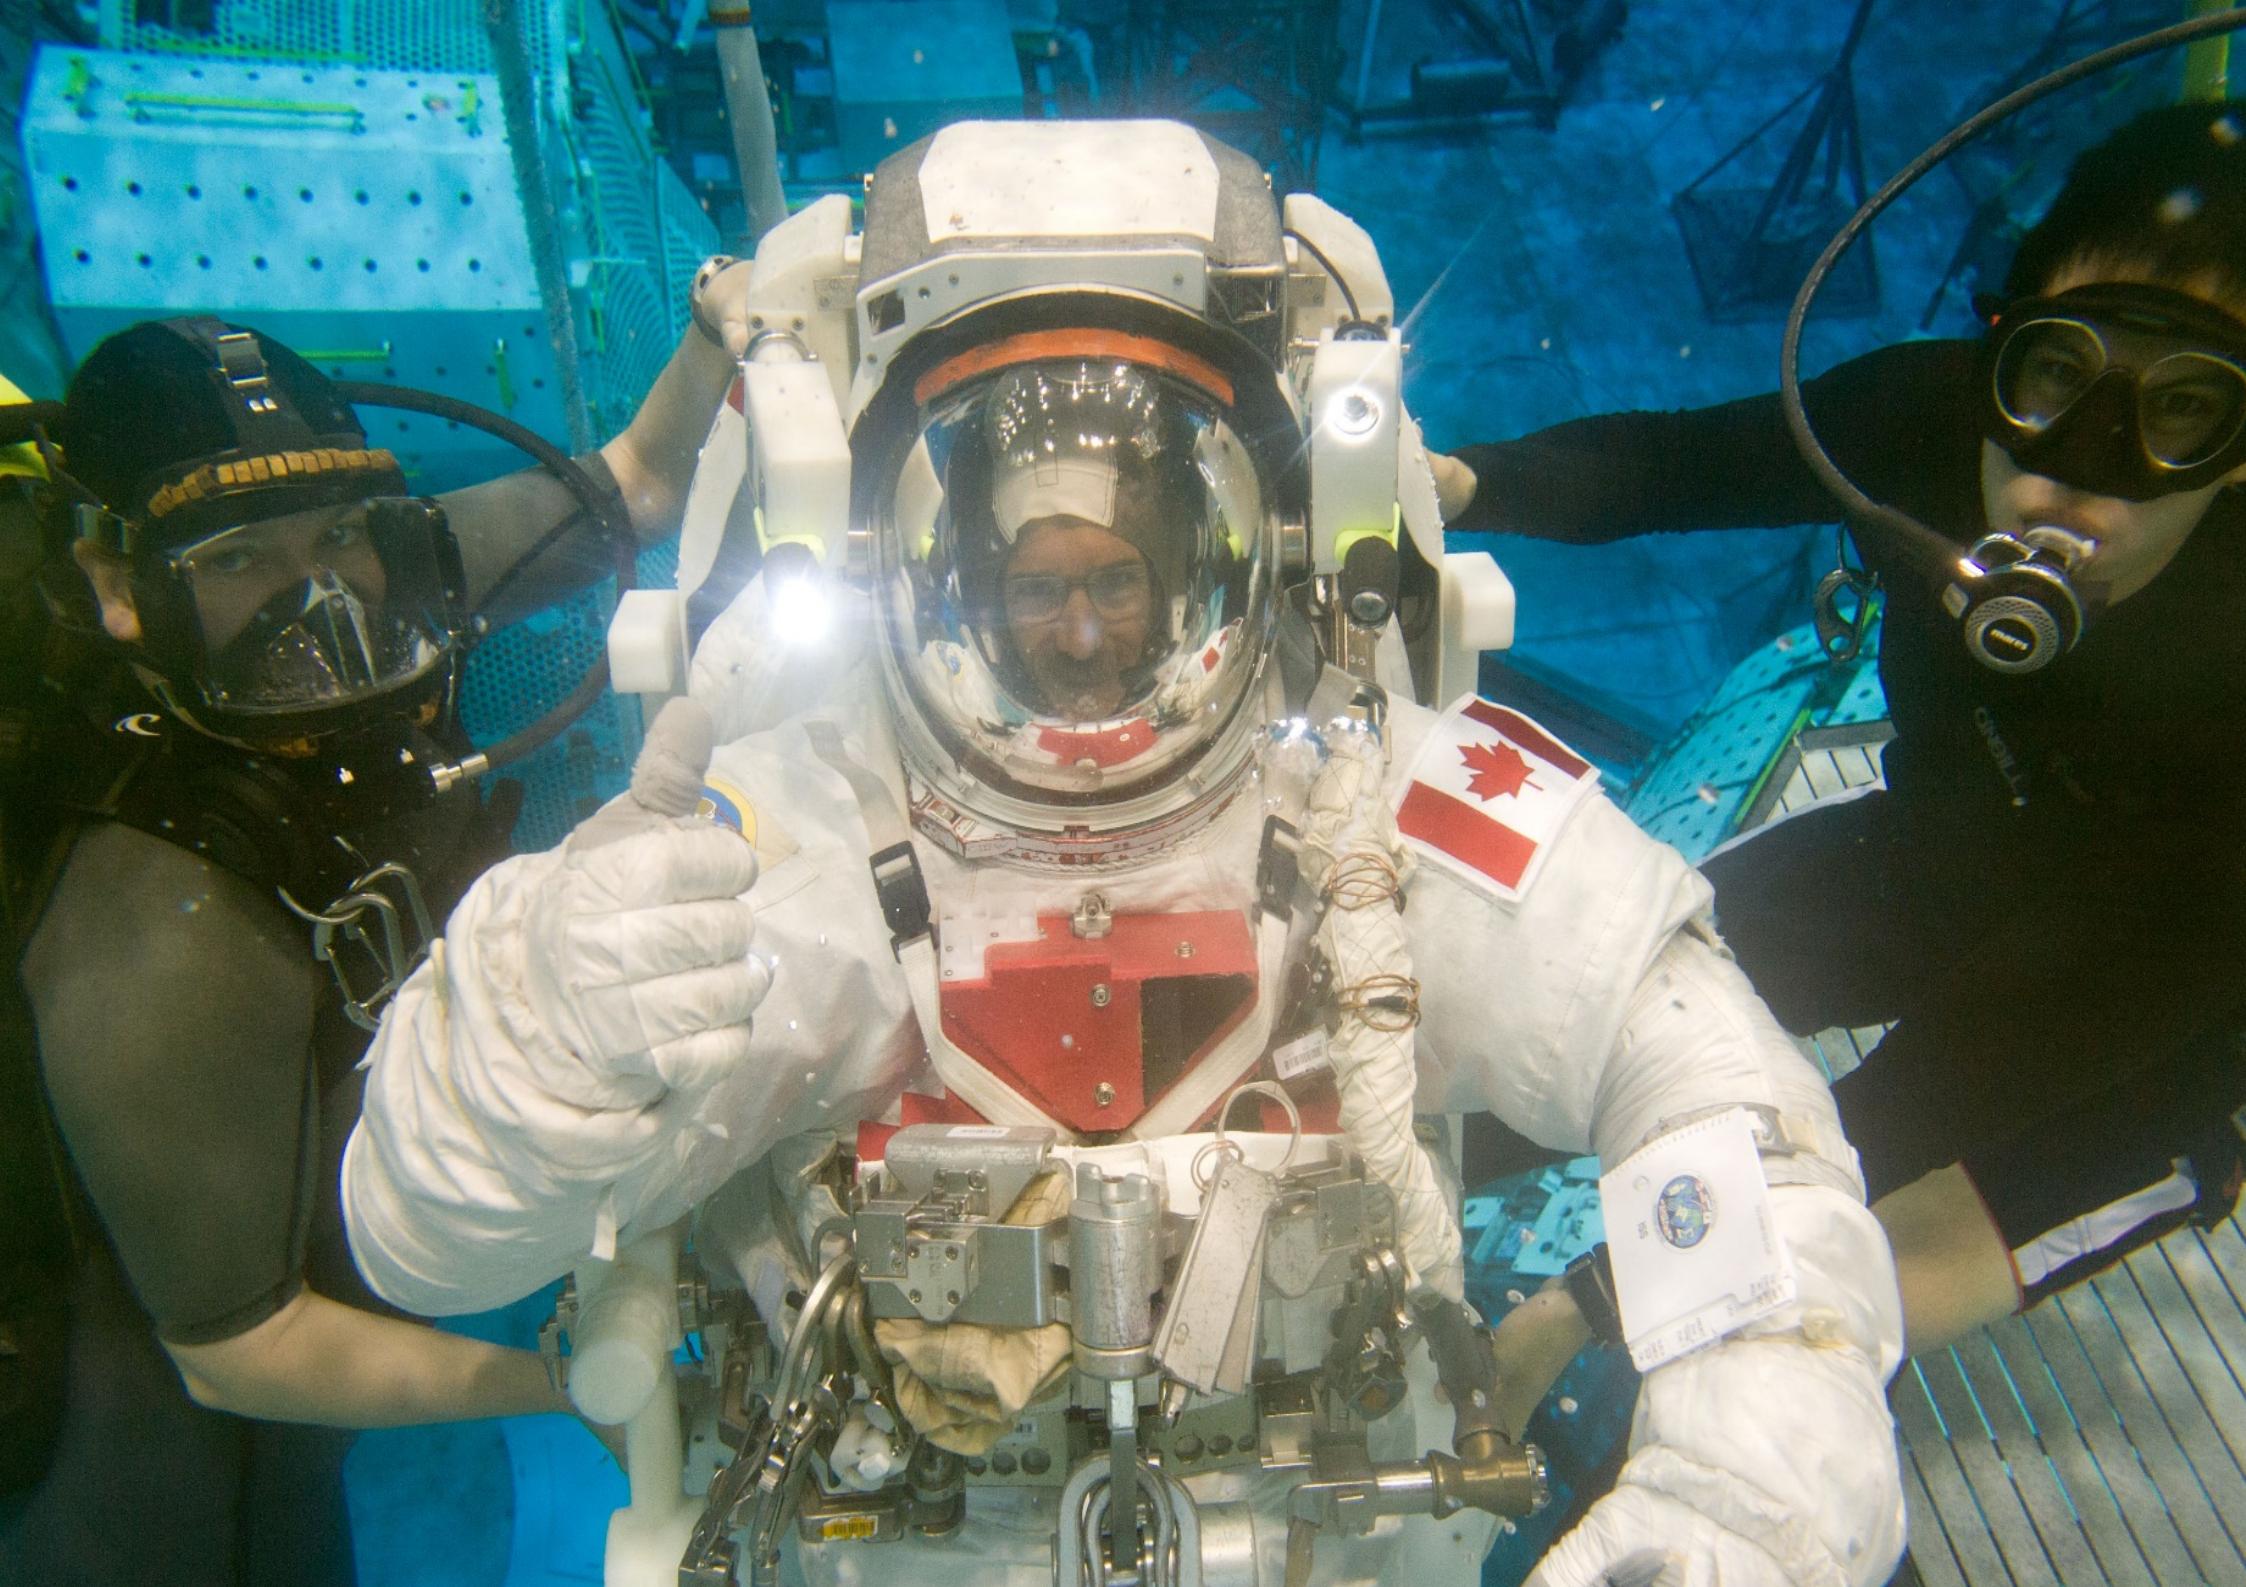

*Space is disease and danger wrapped in darkness  
and silence”*

Leonard McCoy – Star Trek (2009) © Paramount

*...to stay calm in a high  
stress, high stakes  
environment, all you really  
need is knowledge.”*

**Chris Hadfield:  
An Astronauts Guide to Life**

# Fear and context

- Testing is a HUMAN activity
- Testing requires interaction with products, processes AND people
- Testing activities WILL trigger emotional responses including fear
- We CANNOT test without utilising both emotional and rational responses to stimuli

*“Testers use their emotions, but we think critically about them as well”*

Michael Bolton

# Finding bugs...in me!

Prickly, hot skin  
Raised heart  
rate  
Overreaction  
Inappropriate  
feedback  
Objectivity

- Context switching
- Lack of concentration
- Frustration
- Lack of clarity
- Influence

*“People have an emotional investment in not finding out when they have made mistakes.”*

Gerry Weinberg: Perfect software and other illusions

# Communication barrier

A tester's vain attempt to make their bug stand out in the next bug triage meeting

# Nightmare scenario
